

With over 100,000 employees, research and innovation centers spread worldwide, and a range of products ubiquitous in daily life, our client, an internationally renowned group, is a leader in the agri-food market. Its fundamental mission is to promote health through healthy eating for an ever-expanding audience. To strengthen their team within one of their R&I centers, the Group is looking for :

Analytical Chemistry Scientist Manager - M/F
Position based in the Ile de France

Reporting to the Team Leader of Analytical Sciences, your main mission will be to participate in the creation of innovative technological solutions to meet consumer needs. In this role, you will manage a team of two collaborators. As a key player, you will develop methods and analytical tools, particularly focusing on liquid chromatography, to provide technical recommendations and facilitate technology transfer to external laboratories. You will also actively contribute to promoting the analytical skills of the Group by participating in the writing and publication of scientific articles and engaging in international working groups.

To align with the dynamics of your role, you will utilize professional networks to identify emerging technologies, potential partners in the scientific field, and ensure constant technical and bibliographic monitoring in the domain. As a leader, you will establish and maintain strategic relationships within the ecosystem, serving as a bridge between research, innovative startups, and suppliers. Leveraging your experience and vision, you will capitalize on data and results to ensure effective responsiveness for the future.

You hold a higher education degree such as an engineering school or Master's degree, with confirmed experience in analytical research and specifically in liquid chromatography (in food, cosmetics, biology). You have a good command of physico-chemical techniques and ideally have experience in team management. Fluency in English is necessary for this position.

You possess good communication skills, leadership qualities, dynamism, autonomy, a strong team spirit, and technical curiosity. You are proactive and can thrive in a demanding, international environment. If you aspire to play a major role in the future of food innovation and meet the requirements of the position, we invite you to submit your application.

**Our Human Resources consulting firm, MAC ERCI International, specializes in recruiting high-potential profiles (Experts, Managers, Executive Leaders...) in the Engineering and Innovation fields.*
